

Add great Search to your Website

IntraFind **Site Search** is a cloud based website search solution on top of Elasticsearch. Using Site Search you can easily integrate a fast search into your website.

Site Search at a Glance

Self-Service Solution

Secure Search

Site Search fulfills all important standards on privacy and service operation.

Responsive Search

One search for every device. The website search bar adapts to the display size.

GSS Replacement

Easily replace your Google Site Search (GSS) from your website: IntraFind Site Search is a secure and ready-to-use alternative, which works reliably, quickly and safely.

Your Advantages

Easy to use

All website search results are highlighted in a clear hit list. Benefit also from lots of features like spelling correction, stemming and autocomplete.

Simple to install

The API allows you to easily install and integrate the search bar into your website if you want to have maximum flexibility for a specific search solution. There is no expert knowledge necessary.

Customize your search

Fully customizable styling of search bar and hit list

Search in real-time

Updated pages are immediately available in the index.

High Performance

No matter if 1 user or 100,000 users – the search performance remains the same for many simultaneous search requests.

Simple Pricing

Benefit from our simple subscription plans and a free 14-day trial
